HerSafar

A Voice-Commute App

Group 02

Project Idea - HerSafar

Problem

- Female domestic workers face unsafe, costly, and stressful commutes.
- Existing ride apps are English/text heavy → inaccessible for low-literacy women.

Solution

- Voice-first commuting app in Urdu & regional languages.
- Enables safe, affordable commuting without reading or typing.
- Key safety tools: SOS button, buddy system, live location sharing.
- **Target Users:**
    - Female domestic workers (primary)
    - their families & communities (secondary)

MAJOR REQUIREMENTS

FUNCTIONAL

- 🚨 SOS
- 📍 Live Location
- 👤 Trusted Contacts
- 🎤 Voice Commands
- 🚗 Carpool

NON - FUNCTIONAL

- 🎙️ 85% Accuracy (Urdu voice)
- ⚡ 6 sec Response
- 🔋 ≤10% Battery/hr
- 🔒 99.5% Uptime
- 💻 Simple UI

IMPACT

- **Accessibility:** Removes literacy & English barriers.
- **Safety:** Trusted contacts, SOS, and real-time alerts.
- **Affordability:** Shared rides reduce travel costs.
- **Reliability:** Spoken updates and secure payments.
- **Empowerment:** Safer commuting → more mobility → stronger workforce participation.

FUTURE EXTENSIONS

- **Multilingual Support:** Including regional dialects.
- **Smart Device Integration:** cars, wearables & IoT.
- **Personalized Routes:** Learns user’s travel habits
- **Enhance Security:** biometric verification for privacy.

THANK YOU
